✓ EFFICIENT

BRUEST CATALYTIC PIPELINE HEATERS

- > No flame is produced in the reaction
- > Low maintenance
- > Rated for hazardous locations

Automated HOTCAT
at Town Border Station

HOTCAT
Installed at a Town Border Station.
The silent operation, compact size & odor
free characteristics are ideal for TBS.

Automated HOTCAT
at Regulator Station

Automated FREEZ-FITER
Heating Gas Prior to Pressure Cut

TWIN-PAK heater
heating the gas to protect
regulators from Freezing

TWIN-PAK
Cost effective way to surround pipe
& heat the gas as it flows through

AREA & BUILDING HEATERS

- > Flameless Heat
- > No Emissions
- > Safe for Hazardous Locations
- > Easy to Operate

AREA HEATERS
provide safe,
effective
flameless
heat without
emissions

INSTRUMENT FREEZE PROTECTION

- > Enables heated, regulated, clean gas
- > Designed to be installed around instruments
- > Safely & effectively heats them to prevent freezing

ENCLOSURE HEATERS
are custom designed & ideal
for outdoor installation

FREEZ-FITERS [S1800/4000]
are effectively applied in front
of an instrument to preheat the
gas flowing into it

CNG LET DOWN/DECANTING SYSTEMS

CATALYTIC HEATERS
are ideal for situations where
CNG is being brought down
to manageable pressure
